

APPETD Online Workshop

INNOVATION IN LEARNING, SHOWCASING TRENDS AND THE FUTURE.

PRESENTER: ADI STEPHAN

The workshop will delve into the latest trends in learning innovation, exploring how they shape the future of education. We'll tackle the challenges and considerations that arise alongside these advancements, offering valuable insights to navigate them effectively. By the end, you'll gain a comprehensive understanding of the future outlook and actionable recommendations to harness the power of learning innovation for success.

ADI STEPHAN

Chief Learning and innovation officer

With more than 27 years' experience in all aspects of Human Capital and Learning, Adi's success is derived from his ability to develop and manage world-class solutions utilising the latest technologies and methodologies.

Equipped with an extensive background in human resources and information technology his skill lies in creating innovative solutions and environments that translate employee behaviours into high-impact outcomes.

For Learning initiatives to be successful, these outcomes must: enhance knowledge retention, be personalised to individual needs, foster collaborative, and social learning, offer an experience rather than an event, be totally strategically aligned, fit around the shape of work, and allow the individual to learn whenever, wherever and, however. But most importantly be FUN and ENGAGING!

Originally from Windhoek Namibia, he currently resides with his wife and daughter on a smallholding in Midrand / Johannesburg.
